

M86 Appliance Watchdog 3.0.00

M86 Security is pleased to announce the release of M86 Appliance Watchdog software version 3.0.00. This software release requires at least one M86 Security appliance to monitor.

FREQUENTLY ASKED QUESTIONS

Q. Which operating systems are compatible with this software release?

A. This software release is compatible with Windows XP 32-bit, Windows Vista 32-bit, and Windows 7 32-bit.

Q. Which M86 appliances are supported in this software release?

A. This software release supports the following M86 appliances:

- R3000 / M86 Web Filter running software version 4.0.00 or 4.0.10
- R3000 IR running R3000 / Web Filter software version 4.0.10 and ER running software version 6.0.10 or higher
- R3000 Mobile
- ProxyBlocker
- standard Enterprise Reporter running software version 6.0.10 or higher
- Threat Analysis Reporter running software version 2.1.10 or higher
- M86 Security Reporter running software version 2.0.00
- M86 Web Filtering and Reporting Suite running software version 2.0.00 or 2.0.10

NEW FEATURES AND ENHANCEMENTS

New appliances supported

New M86 appliances, M86 Web Filter, M86 Security Reporter, and M86 Web Filtering and Reporting Suite are supported in this software release.

Modifications to service restart feature

The application now only restarts whenever modifications are made to add, edit, or delete an appliance from the configuration tree.

- Due to this feature, the following modifications have been made to the system tray menu:
 - Exit and Stop Service option has been removed
 - The Exit GUI only option has been renamed Exit GUI.
- This modification also affects the Active Alerts window, in that the suppression setting no longer is reset to "No suppression" if the service is restarted.
- The pop-up window that notified the user the service is being restarted after modifications are made to the Configuration tree no longer displays.

Configuration window enhancements

- The following products have been included in the Type menu when adding a new appliance: M86 Web Filter, M86 Security Reporter, M86 Web Filtering and Reporting Suite.
- The Filter HA tab has been removed for R3000 appliances since the Web Filter / R3000 Administrator console already provides this information.
- The Database tab has been removed for ER appliances since the database account is modified on the application itself.

ABOUT M86 SECURITY

M86 Security is a global provider of Web and messaging security products, delivering comprehensive protection to more than 20,000 customers and 16 million users worldwide. As one of the largest independent Internet security companies, we have the expertise, product breadth and technology to protect organizations from both current and emerging threats. Our appliance, software and cloud-based solutions leverage real-time threat data to proactively secure customers' networks from malware and spam; protect their sensitive information, and maintain employee productivity. The company is based in Orange, California with international headquarters in London and offices worldwide. For more information about M86 Security, please visit www.m86security.com.
