WHAT'S NEW IN THE 8E6 ENTERPRISE REPORTER

ER SOFTWARE VERSION 5.1.00

Marshal8e6 is pleased to announce the release of ER software version 5.1.00. This software release requires an ER or R3000IR appliance running software version 5.0.00 or later.

WARNING: The 5.1.00 update will take about 30 minutes to install, and during the upgrade process the system will automatically reboot twice. Also during the upgrade process, the user interface will not be available. Please note that after installation of this update, canned reports will not display for two hours. Additionally, since this software release includes a kernel upgrade for the operating system, once applied, this update cannot be uninstalled.

FREQUENTLY ASKED QUESTIONS

Q. What will the new security and performance enhancements do for the ER?

A. Upgrading the listed system components takes advantage of the latest fixes addressing performance and security vulnerability issues.

Q. Which browsers can be used to access the ER interface?

A. The ER interface works with Windows 2000, XP and Vista using IE6, IE7, and Firefox 3.0. If using Macintosh, OS X version 10.5 can be run with Safari 3.1.2 and Firefox 3.0.
