

What's New in the R3000 '2.0.10.9' Mobile Client Release

This newest software release for the R3000 Enterprise Filter requires an R3000 unit running software version 2.0.10 or later.

Fixes

- **Suspend/Resume:** Addressed an issue that caused the Mobile Client to indefinitely lose connectivity to the R3000 after resuming from standby/hibernation in some cases.
- **Windows Update:** Addressed an issue where Mobile Client was blocking Windows Updates on machines running Windows Vista.
- **IM/P2P:** Corrected an error in the IM/P2P handling logic that caused these categories to be blocked, regardless of whether the profile specified that they should be blocked or not.
- **Error Condition Handling:** Improved the handling of communication errors between applications and the Mobile Client to improve stability.
