

What's New in the R3000 '2.0.10' Mobile Client Release

This newest software release for the R3000 Enterprise Filter requires an R3000 unit running software version 2.0.10 or later.

Enhancements

- Windows Vista support
- Macintosh OS X 10.5 (Leopard) support
- Macintosh Deployment Kit is available for "Macintosh only" environments
- Distribution packages are now placed in the My Documents folder instead of the Program Files folder
- Improved responsiveness when switching network connections
- Improved cooperation with GINA replacements (such as Novell Zen Client)
