

WHAT'S NEW IN THE 8E6 MOBILE CLIENT

8E6 MOBILE CLIENT SOFTWARE VERSION 2.1.0.1

RELEASE NOTES FOR INTERNAL DISTRIBUTION ONLY

8e6 Technologies is pleased to announce the release of 8e6 Mobile Client software version 2.1.0.1. This software release requires an R3000 or R3000IR appliance running software version 2.1.10 or later.

FREQUENTLY ASKED QUESTIONS

Q. What is the benefit of adding more test sites?

A. Additional test sites provide backup coverage in the event that one of the three test servers is presently unavailable.

NEW FEATURES AT A GLANCE

• **Additional Test Sites** – The following two test sites have been added for redundancy:

- <http://test.marshal8e6.com.tw> – new test site
- <http://testsite.marshal.com> – new test site

Tests on these URLs are performed by the Mobile Client to verify whether it is reaching the R3000 set up on the internal network or the R3000 set up in the Mobile mode outside of the network.

OTHER BENEFITS

- Multiple bug fixes (Windows) to handle conditions that previously resulted in the '80001002' error message ("Internet browsing unavailable").
