What's New in the Enterprise Reporter '4.1.10' Version

This Enterprise Reporter software release upgrades version 4.0.20 or higher on an ER-H server to 4.1.10. Since this update includes changes to the table structure, once applied, it cannot be uninstalled.

NOTE: *To install this upgrade, be sure port 8084 is open on your network.*

On all other ER platforms, this software release upgrades version 4.1.00 to 4.1.10 and can be uninstalled.

Enhancements and New Features

- Please refer to the What's New in the Enterprise Reporter '4.1.00' Version document for details on all the new features and benefits of the ER 4.1.10 release on an ER-H server.

- Please note, however, that this software update will *not* upgrade the OS kernel on an ER-H server to version 2.6.

- For all other ER platforms, this software release includes minor fixes.
