

What's New in the TAR '1.1.15' Software Version

This Threat Analysis Reporter software release upgrades version 1.1.10 or higher to 1.1.15 on a TAR server.

Fixes and Enhancements:

- A feature has been included to prevent this TAR unit from upgrading to software version 1.2 until the R3000 unit affiliated with this TAR unit is running software version 2.0.10 or higher.
- A modification has been made to the device registry synchronization process to conserve auto generated ID numbers.
